

LAND USE APPLICATION SUMMARY

Property Location: 4944 Humboldt Lane
Project Name: Humboldt 6th Addition – Lot Variance
Prepared By: Shanna Sether, Senior City Planner, (612) 673-2307
Applicant: Alatus – MyHomeSource
Project Contact: Nick Reimler
Request: To reduce the minimum lot area due to an alley vacation.
Required Applications:

Variance	To reduce the minimum lot area from 5,000 sq. ft. to 4,880 sq. ft.
-----------------	--

SITE DATA

Existing Zoning	R4 Multiple-Family District
Lot Area	4,880square feet / .11 acres
Ward(s)	4
Neighborhood(s)	Lind-Bohanon Neighborhood Association
Designated Future Land Use	Urban Neighborhood
Land Use Features	Not applicable
Small Area Plan(s)	Not applicable

Date Application Deemed Complete	July 11, 2016	Date Extension Letter Sent	Not applicable
End of 60-Day Decision Period	September 9, 2016	End of 120-Day Decision Period	Not applicable

BACKGROUND

SITE DESCRIPTION AND PRESENT USE. The subject property is a vacant parcel that was platted in 2002, during the Humboldt Greenway Planned Unit Development project. This parcel, and approximately 70 others were not completed during the project. Several of the parcels have transferred back to the City of Minneapolis-CPED or returned to Hennepin County as tax-forfeited property. The applicant, Alatus, is proposing to replat parcels in Phase I and II as shown in the attached documents.

SURROUNDING PROPERTIES AND NEIGHBORHOOD. The majority of the area is vacant; the adjacent parcel to the east is a single-family dwelling.

PROJECT DESCRIPTION. The applicant is proposing to replat the existing block and dedicate a new alley at the rear of proposed Lots 1-3, addressed as 4944, 4948 and 4952 Humboldt Ln N. The new alley will reduce the lot area of each of these parcels below the minimum 5,000 sq. ft. of lot area required for a single-family dwelling in the R4 Multiple-Family District. The subject property is proposed as Lot 3 and would be reduced from 5,000 sq. ft. to 4,880 sq. ft. The applicant is applying, concurrently, for a preliminary and final plat (PL 309) and alley vacation/dedication (VAC-1660) to resolve platting inconsistencies with the subdivision ordinance and allow the future construction of single-family dwellings.

RELATED APPROVALS.

Planning Case #	Application	Description	Action

PUBLIC COMMENTS. Staff has not received public comments at the time of preparing the staff report. Any correspondence received prior to the public meeting will be forwarded on to the Planning Commission for consideration.

ANALYSIS

VARIANCE

The Department of Community Planning and Economic Development has analyzed the application for a variance to reduce the minimum lot area from 5,000 sq. ft. to 4,880 sq. ft. based on the following findings:

1. *Practical difficulties exist in complying with the ordinance because of circumstances unique to the property. The unique circumstances were not created by persons presently having an interest in the property and are not based on economic considerations alone.*

Staff finds that practical difficulties exist due to the existing block configuration and the adjacent single-family dwelling to the east. The subject property was platted during the Humboldt Greenway 5th Addition and was intended for single-family dwelling construction. The applicant is replatting the block and dedicating an alley at the rear of proposed Lots 1-3, addressed as 4944, 4948 and 4952 Humboldt Ln N. The alley is necessary in order to allow for detached garages to be constructed at the rear and accessed via public alley, in lieu of a separate curb cut along Humboldt Ln N. The subject property is adjacent to the existing public alley; however, proposed Lot 2 to the north does

not. Without the proposed alley, the applicant would be required to provide a long driveway through the rear of the property, which has the same effect as the proposed public alley. Staff finds that these circumstances were not created by the applicant.

2. *The property owner or authorized applicant proposes to use the property in a reasonable manner that will be in keeping with the spirit and intent of the ordinance and the comprehensive plan.*

The applicant is proposing to dedicate an alley at the rear of the subject property and the two adjacent parcels to the south in order to allow for access to detached accessory structures at the rear of the parcel and individual trash service. The purpose of the subdivision ordinance is to provide for the proper installation and maintenance of adequate public services and facilities, including water, sewer, stormwater drainage and storage areas, streets, alleys, sidewalks, lighting, parks and open space and similar improvements. Further, the R4 Multiple-family District is established to provide an environment of predominantly medium density apartments and congregate living arrangements, single-family and two-family dwellings and cluster developments, on lots with a minimum of five thousand (5,000) square feet of lot area and at least one thousand two hundred fifty (1,250) square feet of lot area per dwelling unit. The alley is necessary in order to allow for detached garages to be constructed at the rear and accessed via public alley, in lieu of a separate curb cut along Humboldt Ln N. The subject property is adjacent to the existing public alley; however, proposed Lot 2 to the north does not. Without the proposed alley, the applicant would be required to provide a long driveway through the rear of the property, which has the same effect as the proposed public alley. Staff finds that the applicant is proposing to utilize the property in a reasonable manner, consistent with the spirit and intent of the ordinance and comprehensive plan. The proposed variance will not alter the essential character of the locality or be injurious to the use or enjoyment of other property in the vicinity. If granted, the proposed variance will not be detrimental to the health, safety, or welfare of the general public or of those utilizing the property or nearby properties.

3. *The proposed variance will not alter the essential character of the locality or be injurious to the use or enjoyment of other property in the vicinity. If granted, the proposed variance will not be detrimental to the health, safety, or welfare of the general public or of those utilizing the property or nearby properties.*

The proposed lot area variance is required due to the dedication of 16 feet at the rear of the property to allow for a new public alley. This alley will allow the proposed detached garage to have alley access and conform to the traditional urban form. The applicant is not seeking additional variances of other provisions in the zoning code. Therefore, the proposed variance will not alter the essential character of the locality or be injurious to the use or enjoyment of other property in the vicinity. The Plat and alley dedication has been reviewed by Public Works and meets the minimum requirements. The proposed alley will require a separate permit by the Public Works department. Therefore, the proposed variance will not be detrimental to the health, safety, or welfare of the general public or of those utilizing the property or nearby properties.

RECOMMENDATIONS

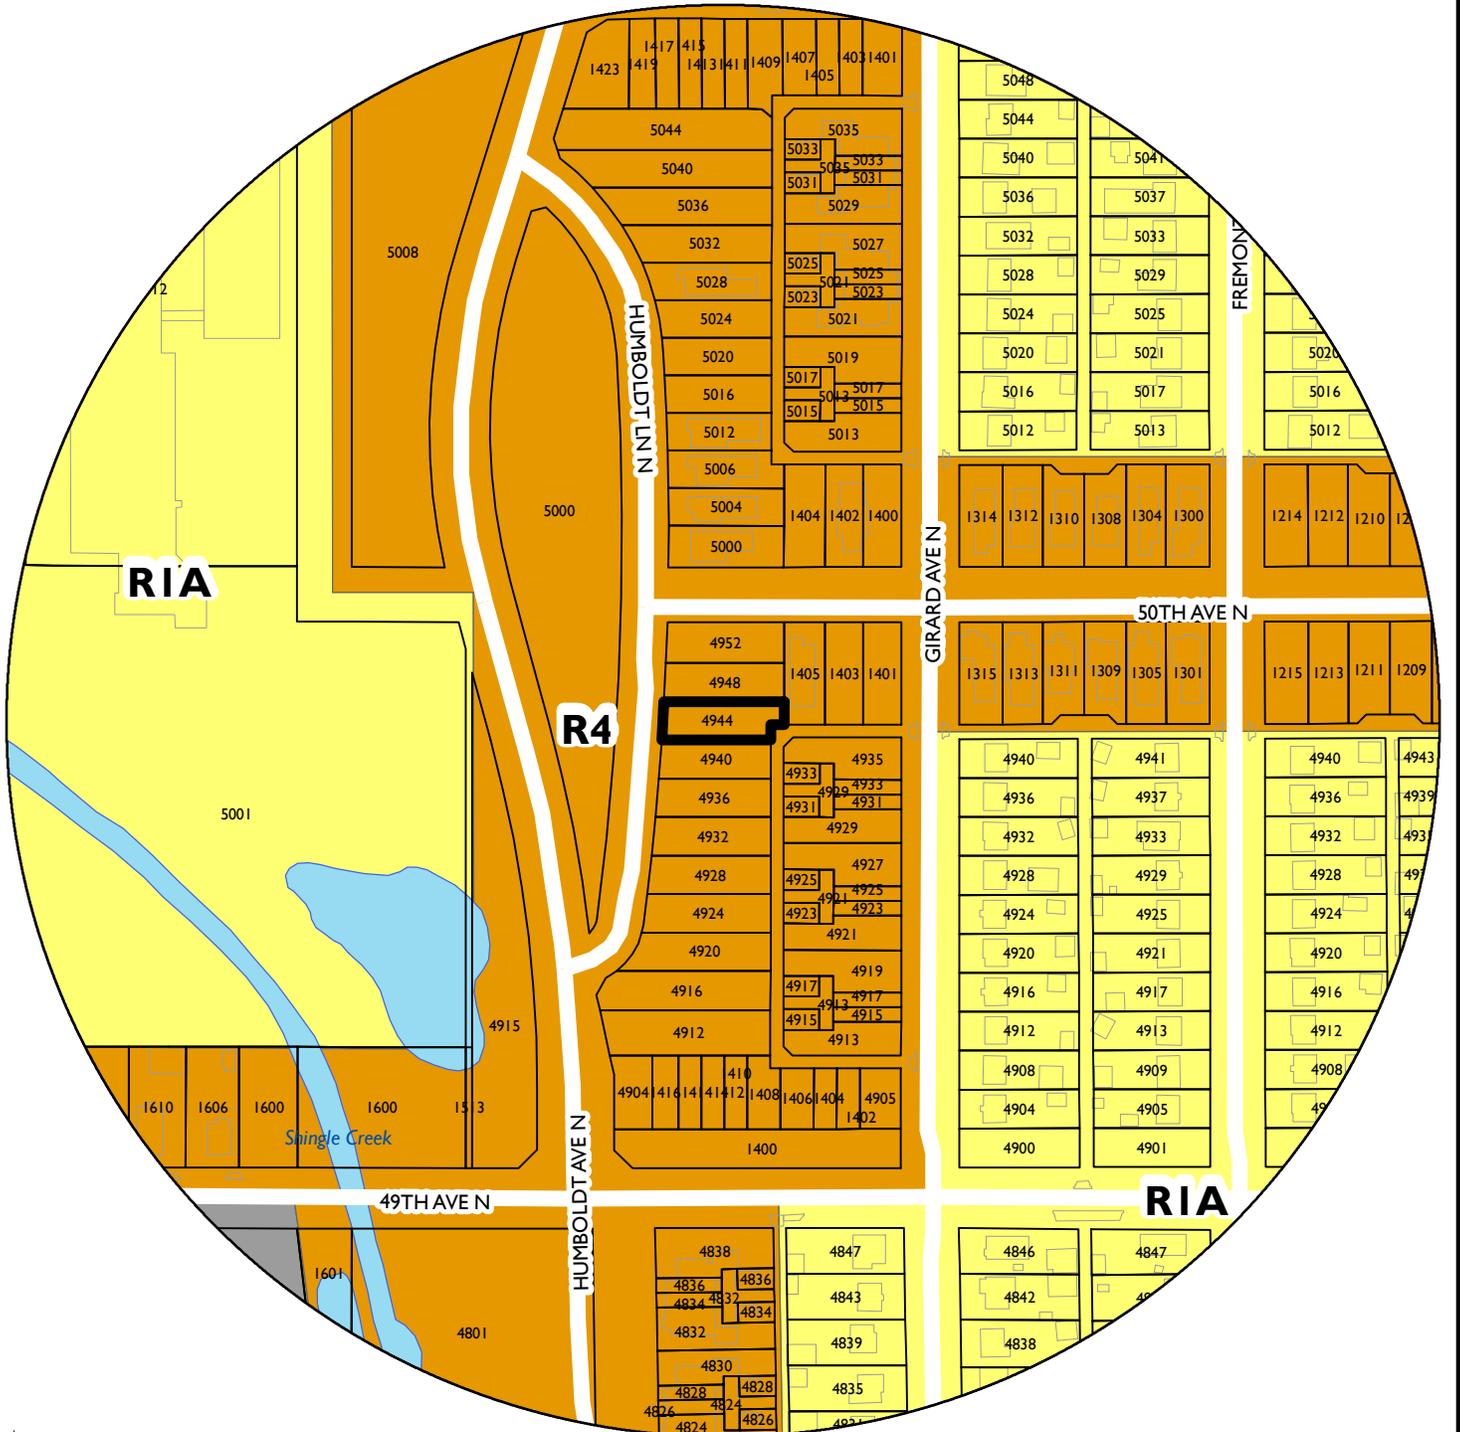

The Department of Community Planning and Economic Development recommends that the City Planning Commission adopt staff findings for the application by Alatus-MyHomeSource for the property located at 4944 Humboldt Ln N:

- A. Variance to reduce the minimum lot area from 5,000 sq. ft. to 4,880 sq. ft.**

Recommended motion: **Approve** the application for a lot area variance.

STATEMENT OF PROPOSED USE

The Homes at Humboldt Greenway LLC is the developer of the former Humboldt Greenway development, now called Parkside at Humboldt Greenway; The Homes at Humboldt Greenway LLC is a co-development between MyHomeSource and Greater Metropolitan Housing Corporation (GMHC). The current phase of development was the selected proposal to an RFP offered by the City of Minneapolis in June 2015. At the time, MyHomeSource and GMHC proposed to construct 63 new homes – 52 detached single family homes and 11 townhomes keeping with similar products as the original Humboldt Greenway development. However, a more in depth market analysis from Marquette Advisors revealed that the detached single family homes in that area have a stronger demand and higher values than townhomes. As a result, the proposed plat allows for all single family homes to be built on the lots and takes 49 small lots and reconfigures them into 19 conforming lots to accommodate single family homes and allow the overall development to complete 65 single family homes. The Humboldt Greenway 6th Addition spans two blocks starting at Humboldt Ave N and 51st Ave N in the northwest corner down to Girard Ave N and 49th Ave N in the southeast corner. As part of the platting process, a General Land Use Application, Subdivision Application, and Alley Vacation will all be submitted for review and approval.

The original plat was part of a planned unit development that allowed for the nonconforming lots and Outlots that are no longer feasible in the new development; the PUD no longer applies. The existing lots were platted as part of the Humboldt Greenway 5th Addition by the previous developer who planned for different types townhomes, making the lots as platted less feasible for detached single family homes. The original plat had created small, narrow lots along 51st Ave N and 49th Ave N to allow for some type of townhome and there were narrow, nonconforming lots along Girard Ave N also platted to allow for townhomes. There were also two Outlots created by the old plat that will no longer exist with the new proposed plat. After discussions with city staff, it was determined that realigning the lots to a more traditional urban grid system with conforming lots would be preferred to the layout created by the Humboldt Greenway 5th Addition plat.

The current proposed plat, Humboldt Greenway 6th Addition, creates 19 lots over 5 blocks, drainage and utility easements, a new alleyway to allow access to the new lots and maintain access to the existing, and ingress and egress easements for shared private drive access off the alley. We have also submitted an alley vacation request for the section of alley that currently exists and cuts through Lot 9, Block 4 of the proposed plat. The new alley will extend the existing one farther south and curve to pass along the southern border of Lot 10. There will also be an easement to allow for two shared private drives off the alleys between Lots 1 and 2 of Block 1 and Lots 1 and 2 of Block 2; as well as to the eastern side of Lots 4-6, Block 8 of Humboldt Greenway 5th Addition to allow access to those properties. The original plat also called for this type of driveway and it is similar to the existing shared private driveway just north of 50th Ave N. The end result is 19 buildable lots that allow for the construction of detached single family homes under the current R-4 zoning requirements and will accommodate the total development of 65 single family homes that will be part of Parkside at Humboldt Greenway.

The homes being constructed along Humboldt Lane south of 50th Ave N consist of four different two-story floor plans each with multiple elevations, all with 3 bedrooms, 2.5 baths, and approximately 1650-2000 finished square feet on the upper two levels, and detached 2-car garages. Homes with an optional finished basement will have an additional bedroom, bathroom and family room. Future phases of development are hoping to include one-level rambler plans to allow for single level living. The exterior of all homes feature LP Smartside siding, stone, and concrete stoops with traditional styling and details that complement the surrounding area. The design of the homes being constructed were reviewed and approved by both the city and neighborhood design review processes as well as with the consideration of the existing homeowner's association from the earlier development phases.

The lots are currently owned by the City of Minneapolis and The Homes at Humboldt Greenway is scheduled to acquire the properties by July 1, 2016 per the Redevelopment Option Contract between the two entities.

Re: Proposed Lot Area Variance
City of Mpls Variance Application

1. Practical difficulties exist in complying with the ordinance because of circumstances unique to the property. The unique circumstances were not created by persons presently having an interest in the property and are not based on economic considerations alone.

The circumstance upon which the variance is requested is unique to each parcel of land. The platting that is in place did not account for access from the east. Therefore, an alley will be built on the eastern side of each lot. This alley reduces the size of each parcel to the following: 4944 Humboldt = 4,880 sq ft. 4948 Humboldt = 4,779 sq ft. 4952 Humboldt = 4,993 sq ft.

2. The property owner or authorized applicant proposes to use the property in a reasonable manner that will be in keeping with the spirit and intent of the ordinance and the comprehensive plan.

The applicant is proposing to use the property in a reasonable matter consistent with the spirit and intent of the ordinance and the comprehensive plan. Neighboring lots are of similar size. These lots are also residential lots and are built or to be built with houses that share similar characteristics such as size, shape, layout, and architectural details.

3. The proposed variance will not alter the essential character of the locality or be injurious to the use or enjoyment of other property in the vicinity. If granted, the proposed variance will not be detrimental to the health, safety, or welfare of the general public or of those utilizing the property or nearby properties.

The character of the area is single family homes with traditional architecture. All have detached garages with alley access in the back. The proposed projects will match this same character and not compromise health, safety, or the welfare of the general public. The houses to be built will be two-story homes and detached garages. The surrounding area consists of homes that will be similar in size and style. The design of the new home will be consistent with the look and feel of comparable homes in and around the neighborhood. The detached garage will face east in order to match the existing garages

Alatus/MyHomeSource is a proven, quality company that is looking forward to adding professionally constructed homes to a thriving Minneapolis neighborhood.

Council President Johnson
350 South 5th St., Room 307
Minneapolis, MN 55415

May 11, 2016

Dear Council President Johnson,

As part of the Parkside at Humboldt Greenway development, some lots need to be platted to allow for single family homes to be constructed under current zoning requirements. The properties are being developed by The Homes at Humboldt Greenway LLC, a co-development between MyHomeSource (MHS) and Greater Metropolitan Housing Corporation (GMHC). The current phase of development was selected in response to a Request for Proposals by the City of Minneapolis in June 2015 and as part of the process, we previously met with the Lind-Bohanon Neighborhood Association and the Shingle Creek Neighborhood Association. At the time, GMHC and MHS proposed to construct 63 new homes – 52 detached single family homes and 11 townhomes, similar to the original Humboldt Greenway development. However, a more in depth market analysis revealed that the detached single family homes in that area have a stronger demand than townhomes. As a result, the new proposed plat allows for all single family homes to be built on all the lots and will be 65 single family homes once completed. The proposed plat, Humboldt Greenway 6th Addition, replats 49 lots over two blocks into 19 traditional lots. As part of the platting process, a General Land Use Application, Subdivision Application, and Alley Vacation will all be submitted for review and approval.

The existing lots were platted as part of the Humboldt Greenway 5th Addition by the previous developer who planned for different types of housing such as two different townhome styles, and was working under a Planned Unit Development (PUD) that allowed for approved deviation from the zoning code. The PUD no longer applies and many of the current lots are not buildable per today's zoning code. After discussions with city staff, it was determined that realigning the lots to a more traditional urban grid system with conforming lots would be preferred to the layout created by the Humboldt Greenway 5th Addition plat.

The current proposed plat, Humboldt Greenway 6th Addition creates 19 new lots, drainage and utility easements, a new alleyway to allow access to the new lots and maintain access to the existing, and an ingress and egress easement for shared private drive access off the alley. We have also submitted an alley vacation request for the section of alley that currently exists and cuts through Lot 9, Block 4 of the proposed plat. The new alley will extend the existing one farther south and curve to pass along the southern border of Lot 10. There will also be an easement to allow for two shared private drives off the alleys between Lots 1 and 2 of Block 1 and Lots 1 and 2 of Block 2; as well as to the eastern side of Lots 4-6, Block 8 of Humboldt Greenway 5th Addition to allow access to those properties. The original plat also called for this type of driveway and it is similar to the existing shared private driveway just north of 50th Ave N.

The homes being constructed along Humboldt Lane south of 50th Ave N consist of four different two-story floor plans each with multiple elevations, all with 3 bedrooms, 2.5 baths, and approximately 1650-2000 finished square feet on the upper two levels, and detached 2-car garages. Homes with an optional finished basement will

have an additional bedroom, bathroom and family room. Future phases of development are hoping to include one-level rambler plans to allow for single level living. The exterior of all homes feature LP Smartside siding, stone, and concrete stoops with traditional styling and details that complement the surrounding area. The design of the homes being constructed were reviewed and approved by both the city and neighborhood design review processes as well as with the consideration of the existing homeowner's association from the earlier development phases.

The proposed preliminary plat is included here for reference. Please feel free to contact me with any questions or comments via phone at (612) 455-0705 or nrreimler@alatusllc.com.

Sincerely,

Nick Reimler
