#### Survey Goals

The 2014 My Minneapolis Employee Engagement Survey has three goals:

1. Provide each employee an opportunity to share thoughts on what is working well and where there are opportunities for improvement in the City.
2. Develop effective action plans that respond to Citywide and department specific employee engagement issues.
3. Implement lasting change to our work environment that makes the City a great place to work, and supports the achievement of City goals.

In response to previous surveys, the City has successfully taken action and made changes designed to improve an employee's overall work experience. In response to the 2012 survey results, a team began work to improve employee recognition practices at both the enterprise and department levels. In May of 2014, the team announced a pilot Enterprise Employee Recognition Program.

Other examples of initiatives undertaken in response to previous surveys are:

1. Implementation of Business Process Improvement (BPI)
2. Total Compensation Statements
3. Minneapolis Matters Employee Newsletter
4. Alternative Work Arrangements Policy and procedures

In addition to City-wide efforts, departments have done significant work to take action in response to survey findings at the departmental level.

The concept of employee engagement is also incorporated into City goals and values which were approved by the City Council on March 28, 2014.

- Goal: "A City that works: City government runs well and connects to the community it serves. Engaged and talented employees reflect our community, have the resources they need to succeed and are empowered to improve our efficiency and effectiveness."
- Values: "We work by..."
  - o Showing employees they are valued - Employees are supported and take pride in public service.
  - o Innovating and being creative - New ideas drive continuous improvement.
  - o Driving toward results - Our efficient, effective work meets measurable goals for today and tomorrow.
  - o Engaging the community - All have a voice and are heard.
  - o Building public trust - All have access to services and information. We work in an open, ethical and transparent manner.
  - o Collaborating - We work better together as one team. We are a valued partner in the community."

Employee engagement was also integrated into other City processes including Results Minneapolis and Business Planning.

### II) Understanding Your Report

---

Before you can share survey results with others in your organization, it is essential to understand the data yourself. This report presents results for your organization and is arranged into several key sections:

#### Sections within Your Report

##### Engagement Index and Engagement Priority Items Summary

This section displays the Engagement Index results and the top priorities for improving engagement. Engagement is a combination of perceptions that have a positive impact on behavior; including commitment, pride and a willingness to be an advocate for the organization.

The engagement priority items are listed in rank order of importance. They identify the survey items most likely to influence engagement for your group. A minimum of 30 responses is required to perform the analysis. If your workgroup had fewer than 30 responses, you will see the priority items identified for a higher level in the organization (i.e. City Overall or Department), and the results for your specific work unit. This is noted above the priority items.

##### Performance Enablement Summary

Performance Enablement focuses on those things that reflect how the organization supports and enables employees' ability to get the work done.

##### Behavior Change Index

The Behavior Change Index measures the employee perception of the amount of action taken in response to the previous survey. Experience has demonstrated that constructively acting upon survey results leads to higher response rates and higher scores in subsequent surveys and consequent improvements in performance.

##### Theme Summary

Survey items are grouped into topic areas, or themes. Theme results give an overall representation for items with a similar focus.

Special note about Theme 2011% Favorable Scores: The following themes have been affected by changes made to the 2014 My Minneapolis Survey: Customer Service, Department Leadership, Equity, Ethics, Immediate Supervisor, Performance Management, Recognition and Work Environment. While the report shows a percent favorable rating for 2011, the rating may not be identical to the ratings shown on the reports published in 2011, as the items/questions which now make up these themes were changed. So, although all items in these themes were on your 2011 survey, they were grouped differently. IBM/Kenexa has recalculated the 2011 scores given the new 2014 theme configuration.

##### Item Summary

This section uses a combination of bar charts and tables to display results and comparative data for all survey items. Survey items are grouped by theme.

### Information Technology (IT)

#### II) Understanding Your Report

---

##### What to look for...

When comparing your results to those of other groups or to previous survey results, use the following guidelines to determine whether differences are meaningful.

If number of respondents in smallest unit compared is ...	Look for differences in Percent Favorable of...
100 or more	5% or more
50 to 99	10% or more
Less than 50	15% or more

##### **Most Favorable / Most Unfavorable Summary**

This section reflects your team's highest and lowest scoring items. Specifically, the Most Favorable items represent those with the highest Percent Favorable and the Most Unfavorable items represent those with the highest Percent Unfavorable scores.

## 2014 My Minneapolis Employee Engagement Survey

### Information Technology (IT)

#### II) Understanding Your Report

##### Sample Results

Report Grouping	Valid Returns	Percent Favorable					2014 % Fav	2011 % Fav	City's Most Engaged Units	Kenexa US World Norm	Strength/ Opportunity		
		Percent Favorable		Percent Neutral		Percent Unfavorable							
City Overall	500	28		38		16	10	8	66%	64%	75%	89%	S
Department	100	8	15	30	27	20	23%	30%	75%	89%	O		
Division	3						--	--	--	--	--		

##### Valid Returns

This number indicates how many employees provided an answer for a specific item in the survey. An "Unable to Rate" response is not considered valid. Thus Unable to Rate responses are not included in the "Valid Returns" count.

##### Bar Chart

To facilitate the interpretation of results, responses are grouped into three categories:

Percent Favorable - Top two most favorable responses (i.e. Strongly Agree & Agree)

Percent Neutral - Neither favorable nor unfavorable response (i.e. Neither Agree nor Disagree)

Percent Unfavorable - Bottom two least favorable responses (i.e. Strongly Disagree & Disagree)

##### 2014 % Fav

The percentage of respondents who selected the most positive responses, typically the top two.

##### 2014 % Unfav

The percentage of respondents who selected the most negative responses, typically the bottom two.

##### 2011 % Fav

The percentage of respondents who selected the most positive responses, typically the top two. These values, if present, are reported from the previous survey administration.

##### City's Most Engaged Units

In order to calculate the "Most Engaged Units" we rank the work units within the City by their Employee Engagement scores; then, we select the top 20%. These groups make up the "Most Engaged Units" and become your internal benchmark. Scores for each question on the survey are then calculated for this group and offered for comparison purpose.

# 2014 My Minneapolis Employee Engagement Survey

## Information Technology (IT)

### II) Understanding Your Report

---

#### Kenexa US World Norm

The Kenexa US World Norm is a composite of employee responses for US based organizations. It provides comparative results that represent the average scores across multiple organizations. When a value is not displayed in this column, a norm is not available.

#### S/O (Strengths / Opportunities)

An “S” or an “O” in this column identifies items that are possible Strengths or Opportunities for improvement when compared to the City’s Most Engaged Unit scores. The guidelines below are used to determine which items represent strengths and which are opportunities for your organization. If your results do not meet either of the criteria, consider them “mid-range” results.

	<b>Strengths</b>	<b>Opportunities for Improvement</b>
Percent Favorable	65% or greater, and	50% or less, and
Percent Unfavorable	Less than 20%	either 20% or greater, or
Percent Neutral	--	30% or more

These guidelines should be used in interpreting all theme and item results contained in this report.

#### Insufficient Data to Report

Double dashes (--) are displayed for a report group when the number of responses for the item or dimension being reported did not meet the minimum required for reporting, or when scores are not available for an item or dimension.

## III) Engagement Summary
